Laatikon pohjalevy - kaikkiin laatikoihin

Product code: 150419

Description

The bottom plate of the tool box made of HD polyethylene keeps the box and tools tidy. The grid on the bottom plate allows sand, small stones and other debris to pass through to the bottom of the box, so that the tools and accessories are neatly on top of the base.

The HD polyethylene grid is a multi-purpose aid for various purposes.

The base plate is made according to the dimensions for the desired product name or in the desired size (note: cutting margin, may differ slightly from the desired dimensions). State the product name or desired size when ordering.

Max size: 1100 x 1200 x 3 mm.
